

FILM SLITTER FALCON

DUAL CUTTING BLADE
Cost effective tool

The Falcon film splitter is the ideal companion for cutting densely layered plastic and paper like materials. Ergonomically designed to reduce hand fatigue and enhance control, this film splitter makes precise cuts with relative ease. The Falcon is also further characterized by a dual cutting path which features a unique push/pull cutting motion, it's this motion that allows each user to make accurate and safe cuts.

Manufactured with high quality carbon steel the falcon blades can be reversed before replacement blades are warranted, making this film splitter an efficient and cost effective solution for all your packaging and slicing applications.

Falcon Film Slitter

- Reversible blades for a longer blade life
- Specifically designed with a dual cutting path for easy operation
- Dual sided carbon steel blade
- Concealed blades reduce risk of injury
- Light weight with ergonomic design
- Suitable for left and right hand users

Effortlessly cuts through adhesives.

Concealed blades make for easy glide cutting technique
