Suitable For:
Food Industry
Warehousing
Construction
Logistics
Mining

Our **MISSION** is to help protect you from slip and fall accidents by providing the most comfortable and maximum slip resistant footwear available anywhere.

SAFETY GRIP® TECHNOLOGY

Safety Grip® outsole is made from an exclusive rubber compound that grips the microscopic roughness of the floor surface.

Our unique micro-channel tread pattern channels liquids away from the bottom of the sole. This combination results in unbelievable traction on all types of wet and greasy floor surfaces.

SLIP RESISTANCE TEST 2210.3:2009

HOW DOES THIS WORK?

The Sole

The sole is made of different rubber compounds that together give the user tremendous grip on any surface.

The pattern allows for many connections to the ground and allows liquids to channel away from the boot. These two features make this boot unique in the Australian market.

The Lining

The lining we use is Dri-lex® Sweat Control Fibre. This material has been tried and tested for years to guarantee maximum breathability, moisture management and comfort. The strong liner is built directly into the boot and breathes to eliminate the potential for sweat build up.

The Material

Our boots are made with high quality leather and premium components to provide long last wear, strong cut and impact protection to your feet. They are comfortable, durable, breathable and water resistant.

DID YOU KNOW....

Slips and Falls account for **more injury and workers' compensation costs** than any other accident type¹?

And the median number of **work days lost due to slip, trip and fall accidents** is between 7 and 14 days²?

Slip and Fall total cost amounted to a **staggering \$8.7 Billion annually³**, that's 21% of all injuries in Australia. **\$78,000 is the average cost per case.**

HOW WELL ARE YOU PROTECTED?

SAFETY GRIP® IS RIGOROUSLY TESTED & FULLY CERTIFIED:

- Certified to AS/NZS 2210.3:2009
- ISO 20345:2004 PPE Safety Footwear
- Exceeds SRA & SRB Slip-Resistant Requirements
- Certified SRC Resistant (Wet + Dry)
- Removable comfort insole with PU and TPU stabilizer
- Injection PU/rubber slip-resistant outsole

THE SOLE THAT CHANGED THE INDUSTRY

Channels liquids away from the bottom of the sole

Unbelievable traction on all types of wet and greasy floor surfaces.

Disclaimer - Please remember that NO sole is 100% slip proof. It is important to combine your safety grip boots with proper floor maintenance to achieve maximum slip and fall incident reduction.
